## Promoting Social Inclusion in Adaptation to Climate Change

The paper reviews the issue of social adaptation, especially for those Australians who are at risk of social exclusion or those who are faced with barriers to full participation in society. It considers ways to address adaptation needs, particularly how local communities can be assisted to provide social capital and resources to improve their resilience.

[Promoting Social Inclusion in Adaptation to Climate Change: Discussion Paper](#), Janet Stanley, Robert Birrell & Ernest Healy, the Monash Sustainability Institute (MSI), Monash University, Victoria, Australia, 2010 [1.48 MB, PDF]

## DRR or CCA: Are We Reinventing the Wheel?

This paper explores the differences, as well as similarities, between disaster risk reduction (DRR) and climate change adaptation (CCA) through analysing climate-related DRR in Papua New Guinea (PNG) within the context of wider development policies. It identifies opportunities for international development policy to support all forms of risk reduction through integrating DRR and CCA strategies.

## **Tourism Research, Practice, and Climate Change**

This paper discusses tourism's role in relation to climate change mitigation and adaptation. It outlines the development of tourism research in response to climate change in the past 25 years. The paper argues that while growing engagement with the challenge of climate change is evident across the tourism industry, this is still limited and not widespread.

## **Economic Modelling of Climate Change Impacts & Adaptation**

This paper discusses the quantitative economic analysis of climate change impacts and adaptation options. It argues that three important features are needed: representation of uncertainty about impacts, in particular the risk of abrupt climate change; fuller representation of economic impacts from climate change and inclusion of non-market impacts; and modelling of equity dimensions.

[Prerequisites and Limits for Economic Modelling of Climate Change Impacts and Adaptation](#), Frank Jotzo, Asia Pacific Program, Crawford School of Economics and Government, Australian National University (ANU), Canberra, Australia, 2010 [97 KB, PDF]

## **Institutions, Policy Processes, and Climate Adaptation**

The paper reviews the coverage of public policy, institutional change, and sustainable development in the adaptation literature. It identifies options that could embed considerations of climate adaptation into policy processes and institutional systems, with a focus on enabling cross-sectoral policy integration, decision making under conditions of uncertainty, vertical policy coordination, issues of capacity and devolution, and policy evaluation and learning.

## **VCCCAR Think Tanks Second Round - Call for Proposals**

Victorian Centre for Climate Change Adaptation Research (VCCCAR) is calling for expressions of interest from Victorian academic institutions to coordinate think tanks in the period from July 2010 to June 2011. The focus of proposals should be on climate change adaptation or the interaction and integration of adaptation and mitigation. Applications may be submitted by 2 July 2010.
