6. Special Report: As Policy Leaders Ponder Australian Options [Grid-locked: North Korea Needs Energy. But can the parties negotiating a solution to the nuclear crisis come up with a viable way to plug in the North?](#) By Peter Hayes, David von Hippel, Jungmin Kang, Tatsujiro Suzuki, Richard Tanter, and Scott Bruce January/February 2006 pp. 52-58 (vol. 62, no. 01) © 2006 Bulletin of the Atomic Scientists Various countries not represented at the Six Party Talks on the North Korean nuclear issue are developing options to engage the DPRK should the talks progress. The authors analyse the leading South Korean energy engagement strategy, and find that it falls short of what is needed to support nuclear disarmament in North Korea, namely, projects that are cheap, fast, replicable, and rely on markets or nimble non-governmental organisations to deliver immediate tangible benefits to the DPRK that can be synchronized with sequential dismantlement steps.
