**Policy Forum Online 06-01A: [The East Timor Truth Commission Report Shines](#), Gerry van Klinken, 2006-02-06**

Australian historian and editor of Inside Indonesia, Gerry van Klinken, writes that the light from the 2000 page Report of the Commission for Reception, Truth and Reconciliation in East Timor "is dazzling. That a tortured little place like East Timor could produce such a shining beacon as this truth commission report seems out of proportion with reality. Who would have expected this from one of the world's poorest countries, traumatised by decades of brutal occupation by the army of its almost equally poor neighbour Indonesia, from a microstate for which the pundits are already predicting failure? Miracles still happen. The report's recommendations are luminescent in their simplicity. The denial of East Timor's right to self-determination - always acknowledged by the UN - was an international project, and it's only fair the world should make amends."
