Telephone Directory United Nations Command ROK/US Combined Forces Command and United States Forces Korea

ATTENTION

The Spring 1985 UNC/CFC/USFK/EUSA Telephone Directory package is designed to be inserted into a 3-ring binder. The listings in this new directory are broken into geographic areas by telephone prefix. As installations are upgraded and provided with state-of-the-art telecommunications equipment, all numbers on that installation may be changed. As part of the switch-over to the new system, you will be provided with an insert to this telephone directory. Your directory is designed so that the old installation pages may be removed and new ones inserted in their place. These insertions will probably be issued on a bi-monthly basis for the next three years to keep your directory current.

Any errors noted or changes which you feel should be made in the telephone book should be reported to the following unit:

1st Signal Brigade
ATTN: ASK-OT-PTO
APO 96301-0044

The directory is designed so that the old installation pages may be removed and new ones inserted in their place. These insertions will probably be issued on a bi-monthly basis for the next three years to keep your directory current.

The directory states:

"The conventional telephone provides more reliable and more voluminous intelligence information than the combined efforts of all the foreign espionage agents working in the Republic of Korea.

Surprising? Not really, if you consider the high vulnerability of telephone systems to unauthorized interception." [page 7]
