**14 June 2012**

The **Nautilus Peace and Security Weekly Report** presents articles and full length reports each week in six categories: *Austral security, nuclear deterrence, energy security, climate change adaptation, the DPRK, and governance and civil society*. Our team of contributors carefully select items that highlight the links between these themes and the three regions in which our offices are found—North America, Northeast Asia, and the Austral-Asia region. Each week, one of our authors also provides **a short blog** that explores these inter-relationships.

## CONTENTS

- DETERRENCE: [DPRK revised constitution](#)
- DPRK: [South and North Korea hold meetings in China](#)
- CLIMATE CHANGE ADAPTATION: [Coastal climate change risk - legal and policy responses in Australia](#)
- ENERGY SECURITY: [America's new energy reality](#)
- GOVERNANCE AND CIVIL SOCIETY: [IAEA gives green light to Kori nuclear reactor](#)
- AUSTRAL PEACE AND SECURITY: [Keynote Address - Dr H Susilo Bambang Yudhoyono](#)

*See this week's [blog](#) from our Deterrence contributor, Peter Hayes.*

## **DETERRENCE: [DPRK revised constitution](#) (30 May 2012)**

"...Comrade Kim Jong Il honorably defended the gains of socialism which is Comrade Kim Il Sung's lofty legacy through military-first politics; changed our fatherland into a politically and ideologically powerful state that is invincible, a nuclear state, and a militarily powerful state that is indomitable; and paved a brilliant main road in building a powerful state."

- [N. Korea calls itself 'nuclear-armed state' in revised constitution](#), Yonhap News (30 May 2012)
- [North Korea calls itself a nuclear power](#), Park Byung-soo, Kwon Tae-ho and Jung Nam-ku, Hankyoreh (1 June 2012)
- [The DPRK Constitution and nuclear weapons](#), Stephan Haggard and Jaesung Ryu, Witness to

---

**DPRK: [South and North Korea hold meetings in China](#), Kim Bo-kuen, Hankyoreh (8 June 2012)**

Representatives from both Koreas met in China to discuss economic cooperation. North Korea has also recently reached out to Southeast Asia. North Korea Foreign Ministry stated they presently had no plans to test a nuclear device. However, in mixed signals, the North Korean Air Forces have acted in unusual patterns recently, a major South Korean media site was destructively hacked and North Korea refused to repay maturing loans.

  - [U.S. special envoy: Myanmar's reforms are a great example for North Korea to follow](#), Malcolm Foster, StarTribune (8 Jun 2012)
- 

**CLIMATE CHANGE ADAPTATION: [Coastal climate change risk - legal and policy responses in Australia](#), Meredith Gibbs and Tony Hill, Department of Climate Change and Energy Efficiency, Commonwealth of Australia (2012) [PDF, 2.06 MB]**

The risks to coastal land and assets as a result of the impacts of climate change will increase substantially in coming decades if current development patterns continue. Coastal climate change (CCC) risks include more frequent inundation of coastal infrastructure and settlements leading to increased damage costs to households and more regular disruption to service delivery in areas affected by flooding.

- 

**ENERGY SECURITY: [America's new energy reality](#), Daniel Yergin, New York Times (10 June 2012)**

Fukushima and the boom in shale gas in the US, in the midst of global economic uncertainties, have

---

changed the perceptions regarding energy security and prospects for electricity fuels markets. Japan may curtail its nuclear dreams, but as more developing countries pursue them with even greater vigor, where does the weak non-proliferation regime and even weaker safety regimes go from here? Or do renewables answer the security prayers?

### **GOVERNANCE AND CIVIL SOCIETY: [IAEA gives green light to Kori nuclear reactor](#), Korea Herald (11 June 2012)**

The IAEA approved the ROK's oldest reactor for continued operation despite a February blackout and back-up generator failure, subsequently covered up by engineers at the plant. Civil groups called for the plant to be permanently shut down. A report claimed that a Chernobyl-type disaster at the Kori plant could result in hundreds of thousands of casualties. Japan plans to restart reactors to increase supply before the summer, despite protests.

- 

### **AUSTRAL PEACE AND SECURITY: [Keynote Address - Dr H Susilo Bambang Yudhoyono](#), The Shangri-La Dialogue, 11th IISS Asia Security Summit, Singapore (1 June 2012)**

If a new pattern of polarization and rivalry among the major powers emerges, that will be a step backward and will lead regional affairs in the wrong direction. We are encouraged that the United States and China are attempting to evolve a positive, cooperative relationship. Both the US and China have an obligation not just to themselves, but to the rest of the region to develop peaceful cooperation.
