Expedition 5: Balance of Trade

Merchandise Trade Balance is the difference between the amount of money a country receives from selling its goods abroad and the amount of money it pays to buy goods from other countries.

1. Access Virtual Expeditions and review the [data on merchandise trade balance](#). Create a graph of the data for the period 1960 to 1997. In which year(s) did the US merchandise trade balance with Japan show a surplus? In which year(s) did the US balance of trade on merchandise show a deficit?

2. What economic trends may have contributed to deficits in the US trading relationship with Japan?

3. What are the implications for the US economy when we maintain a trade deficit with Japan?

4. Read the following two articles, [America Benefits from Free Trade](#) and [The Truth About Trade](#). As a group, prepare a US policy on trade with Japan. What is your philosophy of international trade? What do you want to promote? What do you want to avoid?
