I. Getting Started

- [How to Choose Search Engines](#) Students learn how to distinguish between different search engines and how to conduct more accurate online searches.
- [How to Research Complex Topics](#) Students learn how to develop a research plan, organize their findings and evaluate sources of information.
- [How to Cite Sources](#) Students learn how to prepare citations for resources they discover online.

II. Ecology & Environment

- [Eye in the Sky](#) Students interpret images of Tokyo Bay and San Francisco Bay from space and make maps that show key geographic features.
- [What Goes In?](#) Students investigate environmental threats to the marine ecosystems of Tokyo Bay and San Francisco Bay and hold a mock press conference to share their findings.
- [What's In a Watershed?](#) Students research the watersheds of Tokyo Bay and San Francisco Bay and make maps that illustrate the geography of the watershed.

III. Trade & Economics

- [Trade Away!](#) Students analyze the top imports and exports between the United States and Japan and draw conclusions about the relationship of specific products to job opportunities and wages.
- [Balance of Trade](#) Students graph and analyze the balance of trade between the United States and Japan and prepare position papers on open markets versus protected markets.
- [Exchange Rates](#) Students trade dollars and yen and analyze how exchange rates influence the

global economy.

IV. History & Culture

- [*Earthquake!*](#) Students research the 1906 earthquake in San Francisco and the 1923 earthquake in Tokyo and prepare a "You Are There" news report.
- [*Culture Wheel*](#) Students reflect on their cultural values and compare their cultural profile with other students in Japan and the United States.
